24 April 2023

Centre for Policy Studies
57 Tufton Street
London
SW1P 3QL

Dear *Board Member's Name Here*,

As one of the Board Members of the Centre for Policy Studies, a pressure group which advises the UK Government amongst others, we implore you to use this influence to set the UK Government on a more environmentally friendly and moral path.

The following are three important areas in achieving this, and they form our demands for the Extinction Rebellion-led *Unite to Survive* demonstrations currently taking place in London and elsewhere from 21 to 24 April, 2023:

1) ***Publish* military greenhouse gas emissions**
2) ***Sign and implement the UN's global Nuclear Ban Treaty (TPNW)***
3) ***Do not permit or fund Nuclear Power or Nuclear Weapons***

In your mission "to develop a new generation of conservative thinking, built around promoting enterprise, ownership and prosperity", there are many initiatives the UK Government can take without continuing to develop, build, store, maintain, deploy and dispose of materials used in the nuclear power and weapons industries.

The welfare and prosperity of the UK's citizens would be best served by decommissioning the nuclear industries completely; and ensuring a Just Transition to a fairer, greener economy, while enabling workers to use their skills in more environmentally sustainable and healthier industries – creating new ways to generate a healthy economy, while benefitting the environment and the health and wellbeing of humans and other creatures who live within it.

We urge you to consider our appeal.

Yours sincerely,

Hand Signature Here

Margaret Ferguson Burns
on behalf of *Extinction Rebellion PEACE*, a coalition of organisations for Peace and Justice.
